Hydrogeologist
Program contact address: 101 West Pleasant Street, Suite 205
Milwaukee, WI 53212
Program contact phone: 414-220-5375
Program contact e-mail address: gmichael@commerce.state.wi.us

Submitted Questions and Responses

1.) Any additional information (site investigation, RAP) on former service station property near MW11? The impact from this site may confuse approaches to off-site closure issues.

Neither the Site Investigation Report or the Remedial Action Plan submitted by MSA contained any additional information on the former service station property located near MW-11.

2.) Was groundwater ever tested for PAH? (tanks A, D, and E stored diesel / fuel oil)

The Department has no information on groundwater tests results for PAH testing.

3.) Should the low chlorinated solvent detect in MW6 be considered in our bid?

The Department has not made a determination of the source of the chlorinated compounds detected. All consultants should be aware that the compounds are present. Additionally, the Department has not received a cost separation methodology for the ineligible chlorinated solvent detected in MW6.
